INDIA IN 2047

MISSION

India stands at the threshold of a new era, filled with unprecedented opportunities and challenges. To chart a course towards a future marked by sustained growth, big-ticket development, and continuous prosperity, we need to be part of the “India in 2047” mission.

Our harnesses the collective aspirations, innovation, and determination of the nation’s youth to propel India into the a league of developed nations by its centennial year. It is a call to every Indian to contribute to our country’s progress.

“India in 2047” envisions a nation that stands as a global leader, economically vibrant, socially inclusive, technologically advanced, and environmentally sustainable. We want every citizen to have access to quality education, healthcare, and opportunities for personal and professional growth.

Key Initiatives:

- **Publications:** Come out with thought-provoking books, articles, and research papers that explore the roads o India’s growth. We aim to foster a culture of informed discourse.
- **Events:** Organize events that bring together visionaries, experts, and the youth to discuss, ideate, and collaborate on solutions for the challenges we face.
- **Competitions:** Foster a spirit of competition through contest that encourage creativity. By recognizing outstanding achievers, we aim to cultivate a culture of excellence and ingenuity.
- **Discussions:** Facilitate open discussions on crucial topics ranging from sustainable development to technological advancements. Dialogue is the cornerstone of progress.

Join us in this endeavor as we collectively work towards scripting story that future generations will be proud to inherit.

NATIONAL CASE COMPETITION 2023

CONNECTING THE BEST YOUNG MINDS

The *India in 2047 - National Case Competition* is a first of its kind business case contest.

It aims at bringing together the finest management and accounting students from across the country, providing them with a valuable platform to showcase their problem-solving abilities. These skills are pertinent in the evolving landscape of business models. The contest offers tomorrow's leaders the chance to engage with peers, build a robust network, interact with industry experts, and learn from case experts.

This competition is open to business management, accounting, and graduating students..

THE 2023 CASE: THE SATYAM'S 100 DAYS TURNAROUND

The 2023 edition centered on "Satyam's 100-Day Turnaround," inspired by the book "Tech Phoenix: Satyam's 100-day Turnaround" co-authored by T N Manoharan, a pivotal figure in Satyam's revival, and V Pattabhi Ram. It's considered an exemplary business case, offering students an opportunity to learn, analyse, innovate, and ideate newer business concepts and models. IBS, the world's second leading case house, wrote the case under the guidance of Sanjib Dutta.

The Contest Process

Teams received a four-week timeline to prepare and submit their solutions. Following an initial screening round, shortlisted teams progressed to regional and final in-person events, presenting their solutions to a panel comprising esteemed business executives and professors at the National Finals.

A total prize pool of value INR 100,000 was up for grabs. Teams were granted four weeks to craft and submit their solutions for the initial screening. Both the regional events and the national finals featured an "India in 2047 business conclave" that were held in Gurugram, Pune, Bengaluru, and Hyderabad.

PARTNERS

Organiser

Prime5C is a subsidiary of Prime Academy, an educational academy that has trained 95,000 CA students. Mentored by Atal-Great Lakes Balachandran Incubator Centre (AGBI), that's supported by Atal Innovation Mission, NITI Aayog, 5C aims to skill, re-skill and upskill students and professionals in the areas of finance, business, technology, and life skills.

Knowledge Partner

ICFAI is a leading group of educational institutions with a focus on providing high-quality education through its 11 Universities, 9 B Schools, 8 Law Schools, 7 Tech Schools spread across the country. ICFAI prioritizes flexible and tech-enabled learning, ensuring a transformative educational experience for its students. Its alumni are successfully employed in renowned companies worldwide.

Media Partner

Industrial Economist (IE) was founded in 1968. Through these years, IE has endeavored to present well-researched features. Its founder-editor, S Viswanathan, strived to make the magazine a class apart and stayed true to its founding principles of reporting on developmental issues. IE is one of the most sought after magazines by industry leaders.

Title Sponsor

Saint-Gobain designs, manufactures, and distributes materials and solutions which are key ingredients in the wellbeing of each of us and the future of all. They can be found everywhere in our living places and our daily life: in buildings, transportation, infrastructure and in many industrial applications.

THE JOURNEY AND IMPACT

214-107-59-24-8-3

CURTAIN RAISER

A R UNNIKRISHNAN

Managing Director at Saint-Gobain India Private Limited - Glass Business

The geopolitical landscape globally is undergoing rapid transformations. The world remains deeply fractured due to the ongoing conflict initiated in Ukraine, a conflict that shows no signs of conclusion. Furthermore, a recent West Asian crisis has added to the global discord. Thus, the world finds itself divided by warfare.

Conversely, the COVID-19 pandemic has united the world. This unseen enemy wreaked havoc across the globe, forcing us to pause our routines and rethink various aspects of life, from philosophical perspectives to global governance. It prompted a collective introspection on the fragility of our systems, particularly supply chains. The heavy reliance on China for materials across sectors like automotive and electronics compelled a reassessment, urging countries to minimize dependency and de-risk their supply chains.

During the pandemic, there was a prevalent focus on supply chain diversification. However, the anticipation was that once the pandemic abated and restrictions lifted, trade would revert to its former patterns, heavily involving China. While India has further strengthened its stature in the geopolitical space, recent actions by China has raised scepticism among many countries and

multinational corporations on dependence and further investments in the Dragon.

Amid this global tumult, India stands out with its unique advantages. The nation has cultivated an image of a peace-loving, stable democracy. Its political stability over the years is noteworthy, setting it apart from many developed nations. India's youthful and ambitious population embodies a spirit of self-sufficiency, as underscored by the 'Atmanirbhar Bharat' initiative.

India's remarkable strides in digitalization transcend demographics and geographical boundaries. The country's leap in digital advancement, evident in widespread internet usage and ubiquitous digital payments even in local street markets, exemplifies its technological progress.

The 'Make in India' initiative has evolved from a mere concept to a tangible reality, expanding beyond national interests to global contributions. The projected growth encompasses both manufacturing and services. While India has excelled in the service sector over the years, a resurgence in manufacturing is imminent. Estimates indicate a substantial increase in manufacturing's contribution to GDP, calling for a technological revolution and leveraging the tech-savvy population.

Emerging sectors like EV and renewable energy signify India's shift towards sustainable development. The nation's ambition to scale up renewable energy, especially solar power, represents a transformative journey ahead—a journey necessitating innovation and a collaborative ecosystem among various stakeholders.

This evolving landscape demands a shift from individualistic pursuits to collective endeavours. The emphasis is on practical skills and knowledge rather than mere qualifications, aligning with dynamic industry demands. Emotional intelligence, adaptability, and collaboration will be crucial alongside intellectual prowess.

Navigating this transition will require deliberate, informed decision-making and persistence. Building scale and relevance within entrepreneurial ventures becomes critical for sustained success.

India stands at the threshold of an exhilarating phase—an era brimming with opportunities. The younger generation holds the reins for leading this e-journey. Embrace opportunities, make informed choices, persist in pursuits, and scale new heights.

INDIA IN 2047 – NATIONAL CASE COMPETITION 2023

GRAND FINALE @ HYDERABAD

25 NOV 2023 – ICAI BUSINESS SCHOOL, HYDERABAD

Keynote address

T N Manoharan, Padma Shri Awardee,
Chairman, IDBI Bank

In a lively keynote, T N Manoharan narrated a story that defies norms and unveiled a champion's resilience. He spoke about the Satyam saga where confession preceded investigation, a departure from the usual trajectory in corporate upheaval.

He spotlighted the groundbreaking nature of the public-private partnership committed to reviving a company. Notably, the government's decision to revive Satyam without tapping into taxpayers' funds resonated globally, earning accolades on Wall Street and inciting reflections on what the US could learn from India's approach.

Delving into the realm of accounting, he pondered on whether it veers more toward art or science. Satyam's narrative revealed a disquieting reality—how accounting, when manipulated, could transform into a tale of fiction, unearthing the repercussions of unchecked greed for position in stock market that precipitated the company's downfall.

Amidst the turmoil of the global financial crisis, akin to Lehman Brothers' catastrophic fate, the address delineated the misrepresentation in Satyam's financial

structure. The speaker illuminated the illusory fixed deposits on the asset side, juxtaposed against misleading reserves, symbolizing a financial imbalance.

Yet, amidst this turbulence, the keynote underscored a narrative of collective fortitude and tenacity. While lauding the government board's commendable efforts, the unsung heroes emerged—the steadfast Satyam employees who weathered the storm with unwavering resolve.

Recognized for commendable work pre-scandal, the workforce's post-revival transformation was nothing short of exceptional. Clients hailed their steadfast commitment, reflecting a deep dedication to resuscitating Satyam from the brink.

Amidst governance failure emerged a phoenix—the revival that earned Manoharan the esteemed Padma Shri award. This recognition underscored the collaborative endeavour that rescued Satyam from the abyss.

The keynote illuminated Satyam's narrative—a testament to human toughness, the perils of unchecked greed, and the potency of unity. It urged attendees not just to acknowledge the fall but also to celebrate the rise an epitome of human dedication and steadfast commitment against all odds.

The session seamlessly transitioned, unravelling India's tale—a nation riding the wave as the fastest-growing economy, leveraging its demographic dividend, and fostering an environment ripe for innovation. Rapidly evolving infrastructure embracing digitization showcased India's exceptional rankings in Ease of Doing Business and competitive indices, nurturing a flourishing start-up ecosystem with emerging unicorns.

While optimism abounded in this burgeoning economy with a robust domestic market, concerns loomed over India's standing in crucial metrics like the Human Development Index, per capita income, health security, and Happiness Index—a stark reminder of pressing challenges.

In a passionate aspiration, the speaker envisioned a future where queues outside Indian consulates in the US brim with eager visitors. A dream where the value of 1 dollar equals 1 Rupee by 2047.

INDIA IN 2047 – NATIONAL CASE COMPETITION 2023

REGIONAL FINAL @ BENGALURU

20 Nov 2023 – ICAFI Business School, Bengaluru

Keynote address

J Sandhya,

Group CFO Narayana Health

“India in 2047” is a fantastic book covering various aspects of the future: business, home, country, politics, fashion, sports, philosophy, state of mind, emotions, and society. It aspires for a harmonious, blissful society powered by technology and driven by creativity, discussing how the world will change. It talks about how the world will change.

Today, I won’t discuss what will change but about what won’t. While Artificial Intelligence will run the world, human resilience will hold it together and propel it forward. During the Australia-Afghanistan World Cup semi-final match, the win predictor said that Australia had less than a 10% chance to win. But Maxwell defied all odds, including his own physical limitations, to secure victory. That showcases the power of the human will—a trait that will never change.

Yes, our ability to be resilient and beat all odds will remain constant. However, the human “will” will be turbocharged by technology. Our innate ability to go beyond the ordinary will shine and flourish in the new world. As a child in Delhi, I used to send inland letters to my grandfather. He would reply on yellow postcards. I’m not sure if your generation has seen these. When I sent an inland letter, I eagerly awaited his postcard. Later,

as landlines became common, I could call him. If he had lived longer, we would have migrated to video calls. But regardless of these changes, what hasn’t changed is our longing to communicate. Yes, regardless of the technology facilitating it, humans will preserve their ability to build connections. Whether we travel more or less, we’ll connect, relate, and be there for each other. We may celebrate our best friend’s birthday in the Metaverse, but if they need support, we’ll fly there. Our unique ability to relate and connect cannot be taken away by AI or technology; it can only be enhanced. As future leaders, I urge you to cherish this aspect of human connection. As you progress professionally, nurture and build these connections. Continue making real connections, staying in touch, and meeting people. This will help us build a better tomorrow together.

Many of you might be familiar with the Self-Made man sculpture. I’d like to rename it the self-made person. The sculpture, created by artist Bobbie Carlyle, symbolizes the individual who carves their future from the stone from which they emerge. We continuously carve ourselves to be better every day. Your generation surpasses mine, and the next will surpass yours. This constant spirit of progress will propel us forward.

In the next 25 years, you’ll be blessed with increasing power: the power to transform, recreate, voice opinions, and shape ideas. Just imagine what marvels Edison or Einstein could have created with today’s technological advances. You will wield similar power. But remember, with great power comes great responsibility. As future leaders, you’ll have the ability to make choices. I’m hopeful and confident that when you reach that stage, you’ll make the right choices, driving our country forward in its own unique way. Find the balance between humanity and productivity, costs and compassion, action and serendipity, and between Machine Intelligence and Human Inspiration.

Allow me to conclude by quoting Adi Shankaracharya: “We are not our intellect, memory, organs, ego, body, emotions, identity, vices, or deeds. We are consciousness.”

May everything you aspire to do be an expression of the divine consciousness omnipresent in each of us.

I wish you all the best for the rest of the day and a bright, powerful, and purposeful future.

INDIA IN 2047 – NATIONAL CASE COMPETITION 2023

REGIONAL FINAL @ PUNE

17 Nov 2023 – ICFAI Business School, Pune

Keynote address

V P Joy, Senior Executive Vice President,
Reliance Industries Ltd.

V P Joy, a respected name in education sector and a fervent advocate for writing, skill development, and entrepreneurship, painted a vibrant portrait of youth as the linchpin in steering India's destiny. His narrative unfolded through a lens reflecting his own journey, linking it to the theme 'India in 2047'.

Originating from a humble rural backdrop, Joy underscored that beyond lineage and circumstances, the driving forces to achieve aspirations are passion and values. Drawing upon his expansive 47-year voyage encompassing diverse learning and professional stints post-schooling, he echoed the transformative influence of visionary leaders from the three organisations he worked with - Federal Bank, ICFAI, and RIL.. He acknowledged Shri N J Yaraswamy for broadening his horizons and imprinting invaluable lessons during a pivotal phase of his career.

Diving into the complexity of today's interconnected world, Joy outlined interdependence of individuals,

families, institutions, and nations. For India's potential leap, facilitated by demographics and technology, he stressed the indispensable ingredients: effective execution, unwavering efforts, values-driven strategies, and inclusive development. Referring to the popular advertisement tagline, 'Indian at Heart. Global in Spirit', he urged all to also be 'Universal in Ethos'.

Central to his vision was empowering the youth to be architects of a formidable India by evolving into their finest versions. Therefore, his take is that the focus should be more on 'Indians in 2047' than 'India in 2047'.

He championed the cultivation of both performance and moral character for success, citing insights from 'How Children Succeed' by Paul Tough. His roadmap advocated a dedication to lifelong learning, a culture fostering innovation, and mastery in one's domain.

Joy's discourse exalted resourcefulness, interdisciplinary approaches, and the fusion of academia with industry. He extolled the pivotal role of productivity, hunger for knowledge, and the nurturing of a vibrant start-up ecosystem.

He evoked the spirit of 'loonshot thinking' from Safi Bahcall's book, *Loonshots: How to Nurture the Crazy Ideas*, endorsing it as a catalyst for groundbreaking innovations. His optimism shone through in India's National Education Policy (NEP) 2020, deeming it a potential game-changer if embraced wholeheartedly by all stakeholders.

Viewing a developed nation through the lens of education, he spoke of how freedom of career choice should be unbounded by constraints. Reflecting on his journey, he emphasized that while a good formal education lays the groundwork for an excellent start, the self-taught, driven individual can surpass norms in the marathon of a career.

He concluded by saying that India in 2047 is a work-in-progress and the nation should revisit the progress made every few years and take new directions and give a new momentum as required, with the youth taking the lead.

INDIA IN 2047 – NATIONAL CASE COMPETITION 2023

REGIONAL FINAL @ GURGAON

16 NOV 2023 – ICAI BUSINESS SCHOOL, GURGAON

The event started with Prof. S.C. Sharma greeting the chief guest, jury, and panellists with saplings. Dr. Prapti Paul, delivered the welcome address. Following that, Dr. Amarjit Chopra, delivered a keynote speech.

In his Keynote Address, Dr. Amarjit Chopra outlined India's ambitious vision to surpass economic giants like Japan and Germany by 2030, ultimately aiming for developed nation status by 2047. He underscored India's demographic

challenges, highlighted advancements in the defense sector, and showcased the nation's burgeoning global influence. Dr. Chopra emphasized the subtle challenges embedded in India's diverse demographic landscape, envisioning hurdles due to an aging population and national security concerns. He also highlighted India's strides towards self-sufficiency in defense through innovative research and export commitments.

Prof. S.C. Sharma in his Guest of Honour Address envisioned India as a global economic powerhouse. His vision encompassed social progress, environmental sustainability, and technological prowess. He outlined four pivotal pillars—education, sustainable development, infrastructure, and healthcare—essential for propelling India towards global leadership. He underscored the necessity of prioritizing an improved quality of life for all citizens on India's journey to becoming a global frontrunner.

The Case Contest witnessed presentations from six colleges who had come through two gruelling rounds. Each team dissected the intricate layers of the Satyam Computer Services Scam and its subsequent turnaround strategy. The participating teams

contributed diverse perspectives and innovative solutions. The presentations were followed by a rigorous Q&A session by the jury.

The highly anticipated **Business Quiz**, curated by Dr. Anuthambi Bhojarajan, captivated over 75 participants from various backgrounds.

The competitive spirit soared as participants engaged in an open-house format. Each question was followed by a real-time leader board, dynamically showing the evolving standings. The pulse of the event quickened as correct answers and reaction times influenced the leader board dynamics. At the end of the quiz, three people emerged victorious. They were duly recognized with certificates and prizes.

Following this, a **panel discussion** was held on India in 2047.

Amit Jha highlighted the transformative role of technology and digitalization in reshaping India's economic landscape. Jha envisioned leveraging demographics and international diplomacy as pivotal accelerators for India's economic advancement. Pattabhi Ram offered commendations for India's democratic journey spanning over 75 years. He stressed the significance of accepting election results peacefully, identifying it as a hallmark of a thriving democracy. Reflecting on the consistent electoral processes, Ram emphasized the necessity of safeguarding space for public discourse.

Subramanian G emphasized the indispensable role of a strong opposition in ensuring good governance within a country. Prof RK Anand delved into the reforms essential for economic sustainability. His insights encompassed the role of development banks, attracting foreign capital, SEBI reforms, and enhancements to the bond market. Dr. Anbuthambi B posed a crucial question about bridging the skills-jobs mismatch through education and technology.

Sudhakar Rao moderated the discussion with finesse.

Following the panel discussion, the case winners were named and certificates were distributed to all those who had made it to this round. Two teams, Chandigarh University and Lovely Professional University, moved to the National Finals.

Every attendee received certificates. The event concluded with a vote of thanks by Dr. Vibha Arora.
